

Right One

Marques Houston

Heard all them rumours, you gotta wild hard
Made brothers U-turn, you too hard to guard
Stay travellin' like James Harden, did that boy so dirty
Take a bank on these brothers' feelings , then you pulled up at
three

How cold can you be?
Leave 'em in the dust, no sympathy
Would you ever do that to me?
You never know what this could be, what this could be

You might be the right one
I confess, you're my best, when we flex, always stressed, you'r
e my medicine
You might be the right one
Girl, I spend all my time in these places, wanna spend my days
with you
You might be the right one
I might never go all out, I might take her round the town, put
the squad on her, yeah
You might be the right one
Right one, right one
Right one, right one
Right one, right one

I can't touch it like money, man, whether they know it or not
Even on your bad day, you're the hardest thing on the block
Call brothers like you throwin' a pitch, turned off like you fl
ippin' a switch
Ego gettin' repo'd, like [?], so you takin' they

How cold can you be?
Leave 'em in the dust, no sympathy, no
Could you ever do that to me?
You never know what this could be, what this could be

You might be the right one
I confess, you're my best, when we flex, always stressed, you'r
e my medicine (You're my best, medicine)
You might be the right one
Girl, I spend all my time in these places, wanna spend my days
with you (Spend my days with you)
You might be the right one
I might never go all out, I might take her round the town, put
the squad on her, yeah (Out)
You might be the right one
Right one, right one (Right one)
Right one, right one (Right one)

Right one, right one
