

Electric Car

Mars Argo

I'm your emergency
Break down the front door for me
Think about my perfect life
With the windows down I am driving
To a red suburban house
Round ocean floating on a memory
Of a time when life was green

Reality is just a dream
I want to build your sunshine
And operate your breathing
(Electric, electric)
The frequency incoming
You feel the pulse of my car
(Electric, electric)

I will come and rescue you
In perfect silence we're talking
Imagine I am the pilot
Blue skies will always remind me
Of a letter that you wrote
I fold into a paper plane
(Unfold the love that is flying)
Reality is just a dream

I want to build your sunshine
And operate your breathing
(Electric, electric)
The frequency incoming
You feel the pulse of my car
(Electric, electric)
My battery is a child
My love is never ending
(Electric, electric)
I am communication
I found my destination
(Electric)

I want to build your sunshine
And operate your breathing
(Electric, electric)
The frequency incoming
You feel the pulse of my car
(Electric, electric)
My battery is a child
My love is never ending
(Electric, electric)
I am communication
I found my destination
(Electric)
