

You

Marshmello

In the moments when I hear my voice but don't feel like myself
Wish I could hold you
It's only you
In the moments when I walk these city streets with someone else
I wish I told you
It's only you

Oh you
Only you
When the night is over, out of all the places I could choose
I go to you
Only you
Feel you just below the surface, darling, all I wanna do is
Go to you

I go to you
I go to you

There were times when you would reach out for a little more of me
Now I can see how much it hurt when I stood still
But I'm learning what it's like to open up a different side
'Cause when something hurts this much, I know it's real

Oh you
Only you
When the night is over, out of all the places I could choose
I go to you
Only you
Feel you just below the surface, darling, all I wanna do is
Go to you

I go to you
Feel you just below the surface and I'm getting on with getting through

'Cause things are good and getting better
Holding on until forever doesn't seem to feel so far away
Oh you, only you
Feel you just below the surface, darling, all I wanna do is
Go to you

I go to you
I go to you
I go to you
I go to you
I go to you
I go to you
I go to you
