

Positive Distraction

Mashonda

(He's positive distraction
From a negative reaction
In my heart
He's positive distraction
From a negative reaction
In my heart
He's positive distraction
From a negative reaction
In my heart)

Out of the blue
I feel a new light as the moonlight
I got a view
Way overdue
Love at the first sight
Turn this world upside down
With every sound of words that ease through your lips
All this time here without
A steady ground I land on your finger tips

And when we kiss I heal
You take me there
A place I didn't think was real
So connected to you
We've become one

(He's positive distraction
From a negative reaction
In my heart...)

I cannot break from you
Grip too tight
Can't see my life away from you
(Can't see my life away from you)
Hone on my energy
We lock-in synergy
On gawd
You into me
Sync in you mentally
On gawd

And when we kiss I heal
You take me there
A place I didn't think was real
So connected to you
We've become one

(He's positive distraction
From a negative reaction
In my heart
He's positive distraction
From a negative reaction
In my heart)
