

Just so You Know

Masked Intruder

So you know, if you wanted it, you could have (you can have) my heart. You could have (you can have) my everything, and that's just for starts. So you know, if you're into it, I might have brought a gun or two. Don't work. Don't work don't matter none, if it stays between me and you

Just so you know, if you wanna we could rob this place and make a break. Just saying, we could have it all. We could get the money, and we could get away

And then, if you want it, I'll be yours forever. Maybe we could find a place and settle down together. We can live wherever you want, no matter what it costs. Baby, you just pick the spot, and I'll pick the lock. Just so you know... We could get the money, and we could get away, but you better kiss me now, just in case you and I don't make it out alive

So you know, if they come at us, if they take my life, it will be ok with me, as long as you're right by my side. Just so you know... Even if it's a bust and the cops show up I'll take the fall for us. Just saying, we could have it all: we could get the money, and we could get away. But you better kiss me now, just in case. Yeah - you better kiss me now, just in case
