

Different mind state like hypno  
Get back on my feet and show my drive just like Flintstones  
Live life with no certainty  
Every beat like third degree  
Now that I got it  
They gon' snap necks show courtesy

I've seen this rodeo before  
Throwing all this bull like it's my fault  
I've been learning please  
In purgatory  
Tryna get to heaven's door  
How the hell can you break a man that's already been broken  
Made some choices but God said I'm already chosen

Tryna flip the script of life  
'Cause I know just what it's like  
When a burden all's you got  
And you can't even see the light  
It's like you blinded by the truth  
But then can't see all the lies  
It's like you don't know who's who  
And lost all hope just to try

You need to let it all out  
Don't let it bottle up  
And let it all out  
You need to let it all out  
'Cause we know we know we know

Life can get pixelated pixelated  
Feel like nobody can demonstrate it demonstrate it  
To get us out the hole ain't elevating elevating  
It's like we stuck and know we'll never make it never make it

I know life can get pixelated pixelated  
Feel like nobody can demonstrate it demonstrate it  
To get us out the hole ain't elevating elevating  
It's like we stuck and know we'll never make it never make it

Felt so lonely like my shadow my only friend aha  
Like nobody wanna follow me like a trend aha  
Used to hit up girls they all left me on "Read" ah huh  
Same ones hit me back I can't hear what you said ha-ha

Tryna make a point something like a serve yeah  
Took me 10 years just to know my worth is ah yeah  
Put them pieces back and heal me like a surgeon  
A brand new day I saw the light open the curtains

Never gon' go back 'cause I know what it takes  
You should know that you loved by his holy grace  
You should know that you always got what it takes  
'Cause help is 'round the corner take your foot off the brakes

You need to let it all out  
Don't let it bottle up

And let it all out  
You need to let it all out  
'Cause we know we know we know

Life can get pixelated pixelated  
Feel like nobody can demonstrate it demonstrate it  
To get us out the hole anti elevating elevating  
It's like we stuck and know we'll never make it never make it

I know life can get pixelated pixelated  
Feel like nobody can demonstrate it demonstrate it  
To get us out the hole ain't elevating elevating  
It's like we stuck and know we'll never make it never make it
