Why - why do we turn away When they shout that hymn Marching so brave Their hearts beat on holdly right Their souls belong to those of the weak Walking so blinded Surrounded by brown coated lies Hear propaganda which says Bleed for the master race We're not under the same nation The past has gone - don't fear the new It's your only chance - your only salvation Why should we blond and blue-eyed Chanting a 'heil' - living a lie Evil surrounds us - we lost our way Darkness will lead us through fire and hell We're not waving the same flag Or going down the same road So use your brains - just for one time You can't rule mankind We're not under the same nation The past has gone - don't fear the new It's your only chance - your only salvation No no we don't want it - never more We won't take it - like before Crystal night - never more We're not under the same nation The past has gone - don't fear the new It's your only chance - your only salvation We're not under the same nation The past has gone - don't fear the new It's your only chance - your only salvation No no we don't want it - never more We won't take it - like before Crystal night - never more Never more - like before No never more
