There was a place - a little town Where we used to play and laugh around We went too far - reaching for that star And the light moved away from me And the spirit never died - the world belongs to me This is when I've been given time to live and see I'll never give up - never give in Won't stop believing cause I'm gonna win Sing with my soul before I get old Cause there may be no tomorrow There is no limit to what can be done Climbing the mountain with power so strong Dusty roads - down the way Leaving the future behind me I got a fast car - like a rock star Come and join the ride with me Take a spin downtown Check out who's around I'll show you where you wanna be And the spirit never dies - let the musik take you higher I know what it means to burn That's how I began to learn So never give up - never give in Rise from the fire if you're gonna win Sing with your soul - soon you'll be old Fight the demons inside you There is no limit to what can be done Climb every mountain with power so strong Dusty roads on the way - leaving the past behind you I've seen love in vain I have felt the pain Torn in desire Lead by the fire And as I lived it all the world became to small And my colors grew colder The spirit takes me higher Never give up - never give in Won't stop believing cause I'm gonna win Sing with my soul before I get old What if there's no tomorrow There is no limit to what can be done Climbing the mountain with power so strong Dusty roads - down the way Leaving the memories behind me Use the spirit
