

# Balance

Matisyahu

Life is like a tightrope in the sky  
Each step you take is to survive  
Will I make it to the other side?

When the wind blows, you get frightened  
Don't look down, you'll be alright  
There'll be lows there'll be highs

'Cause how can you get by  
Without balance?  
There's no easy life  
Without a challenge  
You can't get there without it

Can't get there without it

How can you get by?

Stuck on a ship  
Out in the ocean  
All alone with your emotions  
Say a prayer and try to focus  
On the moments of your life  
As you move from side-to-side  
Stay steady, don't capsize  
And let the waves come crashing down

'Cause how can you get by  
Without balance?  
There's no easy life  
Without challenge  
You can't get there without it

Can't get there without it

How can you get by?  
How can you get by?

Like it was your first time on a bicycle  
And your dad. He just let go  
Ya you're going fast now  
Heading down the slope  
And you're losing all control  
You can feel the speed  
Beneath your feet  
With bumps along the road  
Lean back and feel the breeze  
And let your body coast

'Cause how can you get by  
Without balance?  
There's no easy life  
Without challenge  
You can't get there without it

Can't get there without it

How can you get by?

How can you get by?

How can you get by?

There's no easy life
