

Heartache never made me cry  
Sinking bottles every night  
Living for a better life  
So the devil can't catch me

Looking for an alibi  
So we can stay another night  
You can take a later flight  
We can find another way to get

High - searching for a sodium sky  
Somewhere that our dreams don't die  
That's where I find you  
Gold - walking on a river of gold  
Somewhere that our dreams take hold  
That's where I find you

Drinking til we levitate  
I'll take another lemonade  
That's the way we medicate  
So the devil won't chase us

Every word is visual  
Every breath is physical  
Chase another miracle  
We can find another way to get

High - searching for a sodium sky  
Somewhere that our dreams don't die  
That's where I find you  
Gold - walking on a river of gold  
Somewhere that our dreams take hold  
That's where I find you

Yeah I love the way you never let me go  
Yeah when you and I are angels in the snow  
Yeah we're higher than the fire ever goes  
Where the devil can't catch us  
If you love me then you never let me go  
Yeah I know never wanna be alone  
Yeah we're higher than the fire ever goes  
Coz we found another way to get

High  
High  
High  
Yeah we're higher than the fire ever goes

High  
Where the devil can't catch us  
High  
Where the devil can't catch us  
High  
Yeah we're higher than the fire ever goes
