

You keep me up 'til four in the morning
You got me, got me thinkin' of you
Every minute, every hour I keep falling
When I don't need to feel it too

I can get no sleep, you got what I need
When I got you next to me

I'm staying up for love, love, love, love, love
I can't get enough, enough, enough, enough, enough
Waiting for the moment we can touch
I can't get enough, enough, enough, enough, enough
I'm staying up for love, love, love, love, love
I can't get enough, enough, enough, enough, enough
Waiting for the moment we can touch
I can't get enough, enough, enough, enough, enough
Staying up for love

Staying up for love

So whisper in my ear when you come in
And tell me, tell me you're in the mood
Baby, you don't need to give me no warning
The only thing I want is you

I can get no sleep, you got what I need
When I got you next to me

I'm staying up for love, love, love, love, love
I can't get enough, enough, enough, enough, enough
Waiting for the moment we can touch
I can't get enough, enough, enough, enough, enough
I'm staying up for love, love, love, love, love
I can't get enough, enough, enough, enough, enough
Waiting for the moment we can touch
I can't get enough, enough, enough, enough, enough
Staying up for love

I'm staying up for love, love, love, love, love
I can't get enough, enough, enough, enough, enough
Waiting for the moment we can touch
I can't get enough, enough, enough, enough, enough
Staying up for love
Staying up for love
