

The Night Has Just Begun

Matt Bianco

The night has just begun
The night has just begun

Nobody can love you
The way that I love you
You know, that is true
Understand the way it is with you
Nobody can hold you
The way that I hold you
When you're feeling blue
Give yourself to me like lovers do

And we're back to every inch of love tonight
To you and I in ways for morning light
Please, don't go

The night has just begun
The night has just begun

What could be tragic
A moment of magic don't come
Every day
Is it so wrong loving someone this way
I know that you want me
The way that I want you is play after see
So give yourself to me, oh baby, please

And we're back to every inch of love tonight
To you and I in ways for morning light
Please don't go

Nobody can love you
Baby the night has just begun
Come and give it to me
All night, all night, all night
Nobody, nobody, nobody can love you
The way I love you
