

High as the Night

Matt Cardle

I don't wanna feel tonight
I wanna fall from grace with you
I don't wanna think tonight
I just wanna escape this place with you
We don't need anything
We don't even need tomorrow
Come or let go
Hold on or let go

Inhibition dead and gone
There's nothing left to lose
With bad intention
I take hold of you

We get high as the night
We get high as the night

Do you wanna learn to fly
Cause I really wanna fly with you
How does it feel so good
So good that I could die with you

We don't need anything
We don't even need tomorrow
Come or let go
Hold on or let go

Inhibition dead and gone
There's nothing left to lose
With bad intention
I take hold of you

We get high as the night
We get high as the night

We'll be there together
Move into the light
It's not forever
We've only tonight
From light as a feather
Burning so bright
We'll be there together
As high as the night

I don't wanna feel tonight
I wanna fall from grace with you
I don't wanna think tonight
I just wanna escape this place with you

We get high as the night
We get high as the night

We'll be there together
Move into the light
It's not forever
We've only tonight
From light as a feather

Burning so bright
We'll be there together
As high as the night
