

# Everything's Fine

**Matt Corby**

Gentle as the night holding up the moon  
Come in like the wind on an August afternoon

Facing each other only way to discover  
All the edges of our minds  
We never meant to make it  
But soon enough, we take it past a point and that's alright

Formidable angel  
Pulling out my truth  
Give me a reason  
Show me what's the use

Cool down, everything's fine  
What you got to worry about?  
I need you to fool 'round  
If I know you can fly  
Then I don't have to leave the ground  
Taken by the sight of a flower on the bloom  
There's no way I'm leaving  
To miss it would be cruel

Facing each other, only way to discover  
All the edges of our minds  
We never meant to make it  
But soon enough, we take it past a point and that's alright

Cool down, everything's fine  
What you got to worry about?  
I need you to fool 'round  
If I know you can fly  
Then I don't have to leave the ground  
Taken by the sight of a flower on the bloom  
There's no way I'm leaving  
To miss it would be cruel

Don't freak out about the future  
It's beyond ya  
Don't freak out about the future  
It's beyond ya  
It's beyond ya

Cool down, everything's fine  
What you got to worry about?  
I need you to fool 'round  
If I know you can fly  
Then I don't have to leave the ground  
Taken by the sight of a flower on the bloom  
There's no way I'm leaving  
To miss it would be cruel
