In the back of my mind Everything seems fine You go your way I go mine We just need to take our time

It is good... To be alone

And I was lost in the dark We all had to play our part I was hunted by the one The one that froze my heart

It is good... To be alone It is good... To be alone

I keep telling myself It's gonna be better I keep telling myself It's gonna be better It's gonna be better

It is good... To be alone It is good... To be alone
