

Never Change

Matt Costa

Talk to my eyes, I ask them how they doing
Some things don't look so good today
Talk 'til the summer
He was worried about women
Guess that some things never change
Guess that some things never change

Never change, never change
Some things never change
Never change and then they change
Just when you think they'll never change

Talk to my feet, said they can't stop moving
Wish they would carry me far away
Even my street
Is cracked from heavy weather
Maybe they'll fix it one of these days
Guess that something never change

Never change, never change
Some things never change
Never change and then they change
Just when you think they'll never change

The old man at the corner shop
It was late last night but his heart just stopped

Never change, never change
Some things never change
Never change and then they change
Just when you think they'll never change
