

Even Though

Matt Hammitt

On the mountain trails
I can see what's below
As the snow caps melt
Into rivers flow

Wish you could see
Wish you could know
Can you hear my voice
Through the winter cold

Can you feel my arms
Wrapped around your heart
Even though
Even though
Can you feel my love
Everywhere we go
Even though
Even though

Steady my heart
As we follow this road
When we finally hold you
How will we let go
When we finally hold you
How will we let go

Can you feel my arms
Wrapped around your heart
Even though
Even though
Can you feel my love
Everywhere we go
Even though
Even though

Even though we know the ember will fade away
It only takes a breath to start a flame

Can you feel my arms
Wrapped around your heart
Even though
Even though
Can you feel my love
Everywhere we go
Even though
Even though

Wish you could see
Wish you could know
We will hold you again
Even though
