

I Saw the Light

Matt Hammitt

Thought I was good living moment to moment
As long as blood was rushing through my veins
I used to chase a simple satisfaction
I never knew there was a better way
But on a road in the middle of nowhere
I watched a new sun start to rise
And like the stars in all of their radiance
You lit the sky right before my eyes

I saw the light shinning in the distance
I heard a voice calling me home
I came alive, found what I was missing
Hallelujah, I saw the light
The light, light, the light

I used to fight just to find my position
Cause I was so insecure inside
I felt defined by my victories and failures
But now I know what true love looks like

I saw the light shining in the distance
I heard a voice calling me home
I came alive and found what I was missing
Hallelujah, I saw the light
The light, light, the light

It's getting brighter everyday
It's getting brighter, brighter
It's getting brighter everyday
It's getting brighter, brighter
It's getting brighter everyday
It's getting brighter, brighter

(Yeah!)

I saw the light shining in the distance
I heard a voice calling me home
I came alive, found what I was missing
Hallelujah, I saw the light
The light, light, the light
The light, light, the light
