

# Over You

Matt Hires

[Verse]

It all, began like a melody  
Soon every stupid love song was made for you and me  
Yeah we knew what we could be  
And your heart burnt hot like a summer day  
Until that August breeze turned into a hurricane  
And it blew your love away  
Yeah it blew your love away

[Chorus]

So tear up the pictures burn all the letters  
Trade in your memories for something better  
Bring it all down you've got nothing to lose  
I won't waste my nights wishing we were together  
I won't pretend that love lasts forever  
I'll be gone but I won't get over you  
No I won't get over you

[Verse]

It all broke down and fell out of key  
So you ran away to find, oh, another song to sing  
Well I hope he's just like me  
Yeah I hope he's what you need

[Chorus]

So tear up the pictures burn all the letters  
Trade in your memories for something better  
Bring it all down you've got nothing to lose  
I won't waste my nights wishing we were together  
I won't pretend that love lasts forever  
I'll be gone but I won't get over you  
No I won't get over you

[Verse]

It all began like a melody  
Now I still hear your name in every song I sing

[Chorus]

So tear up the pictures burn all the letters  
Trade in your memories for something better  
Bring it all down you've got nothing to lose  
I won't waste my nights wishing we were together  
I won't pretend that love lasts forever  
I'll be gone but I won't get over you  
No I won't get over you  
Yeah I won't get over you  
I won't get over you
