

queen bee

Matt Maltese

Forget science, forget song
Forget the fact I'm biologically programmed
To look for a special bond
In every checkpoint of this odyssey I'm on

You could be my queen bee
I would love you endlessly
Take you to the movies
Share our bitter history
You know, I know
Its never that easy
You know, it doesn't have to be hard

National timebombs, trolling drunks
We out here cheek to cheek and no one gets along
And you better find your one
It helps extend your life expectancy and all

You could be my queen bee
I would love you endlessly
Take you to the movies
Share our bitter history
You know, I know
Its never that easy
You know, it doesn't have to be hard

You could be my queen bee
I will love you endlessly
I know you haven't met me
I know I'm probably coming on strong
Come rain, come climate change
I'll be waiting
In my private moments, I am praying for you
