

Drive On

Matt Mays

I'm really pleased to meet ya
But I really must go
I've been dying with the leaves
Melting with the snow
I really gotta go

There's no fear of losing
The horizon holds the winning hand
The rearview plays a movie
You never gotta see again

Everybody seems to want the same thing
Blinded by the light of a diamond ring
Well look at you you've got too much to prove
Too many songs to sing

So drive on into the moonless night
And just for a second everything is alright
Drive on and give it all away
You've got to trust yourself
Drive on

There would be no good sunsets
If it wasn't for the rain
You can't have true love
Without pain

So you drive a little faster
Cause you don't even have a place to go

You breathe a quiet Hallelujah
And let it all fall

Everybody seems to want the same thing
Blinded by the light of a diamond ring
Well that ain't you, you've got too much to do
Too many songs to sing

So drive on into the moonless night
And just for a second everything is alright
Drive on and give it all away
You've got to trust yourself
Drive on

Let yourself turn into something else
Feel yourself fall into the great white open
Let yourself turn into something else
Feel yourself fall into the great white open
Let yourself turn into something else
Feel yourself fall into the great white open
Let yourself turn into something else
Feel yourself fall into the great white openness
