

## Brain Tumor Blues

Matt McAndrew

I once severed time behind the open jaws of hell  
With shutter vision strobin' through the window of my cell  
Pines provide a place to hide my mutilated scream  
I just woke up in another dream

Can you help me through  
These brain tumor blues?  
Thinkin' normal's somethin' I can't do  
Please help me through  
These brain tumor blues  
I'm goin' down the old familiar road  
Back to you

I couldn't fake a prison break, my confidence was dead  
Terrified, effeminate, if only in my head  
I've been criticized, depersonalized, and high it broke my heart  
I know that it's not easy bein' smart

Can you help me through  
These brain tumor blues?  
Thinkin' normal's somethin' I can't do  
Please help me through  
These brain tumor blues  
I'm goin' down the old familiar road  
Back to you

Do you think I'm not embarrassed?  
Oh, I know that something's wrong  
You might not understand it  
But one day we'll both be gone  
And you know what's killing me?  
The distance in between

Can you help me through  
These brain tumor blues?  
Thinkin' normal's somethin' I can't do  
Please help me through  
These brain tumor blues  
I'm goin' down the old familiar road  
Back to you

The sky is clear  
Can you see your sun shinin'  
Obsessive rays on a well-lit earth?
