

Blush

Matt Nathanson

For a minute there we were perfect
Crash and burned but it was worth it
We made the beautiful people wanna be like us
And that's enough
Some heart's gotta break to let the light in
Took some time but now I'm smiling
I loved you even before I knew what love was

Everything else felt so unimportant back in your Boston bed

And when the sun is getting lower and your wildest days are done
And they ask you about a photograph from back when you were young
Well baby, you don't have to tell em what you did when we were us
But when you think about it, I hope you blush
Just a little bit
When you think about it, I hope you blush
Just a little bit
When you think about it, I hope you blush

When I play it back, it's like a movie
And all the best parts still move me
Yeah you gotta admit we looked good back then
Always sneaking off from the party
Everybody knew it didn't matter
We were burning like blue flame in a furnace
I could have powered the city every time you kissed me

Everything else felt so unimportant back in your Boston bed

And when the sun is getting lower and your wildest days are done
And they ask you about a photograph from back when you were young
Well baby, you don't have to tell em what you did when you were us
When you think about it, I hope you blush
Just a little bit
When you think about it, I hope you blush
Just a little bit
When you think about it

Just between you and me
Part of me will always be in love
Just between you and me
Part of me will always be in love
We're better off no doubt
What's it matter now?
But when you think about it I hope you blush
Just a little bit
When you think about it, I hope you blush
Just a little bit
When you think about me I hope you blush
Just a little bit
And when you think about it I hope you blush
When you think about it I hope you blush
