

The Higher Ground

Matt Simons

There's something about the melody
How it hits when I close my eyes
Straight to paradise
There's something about the harmony
And the way it makes me feel
Heaven knows that it's real

Everywhere I go
I know I'm not alone
I'm smiling just because I feel the love
And it makes me feel at home
Even when I'm down
Within the heart of me I believe
We can find the higher ground

Woah woah
We can find the higher ground
Woah woah
We can find the higher ground

There's something in the atmosphere
Something in the air I can't describe
It makes me feel alive
And there's something about the people here
That everybody seems to know
Like one collective soul

Everywhere I go
I know I'm not alone
I'm smiling just because I feel the love
And it makes me feel at home
Even when I'm down
Within the heart of me I believe
We can find the higher ground

Woah woah
We can find the higher ground
Woah woah

Come on up, I want to feel it
Come on up, I want to hear the sound
We can find the higher ground

Come on up, I want to feel it
Come on up, I want to hear the sound
We can find the higher ground

Woah woah
We can find the higher ground
Woah woah
We can find the higher ground
