

Man Made

Matt Stell

A skyscraper, record player, Kentucky 80 proof
The telephone, the radio, and footprints on the moon
The plane, the car, and all the parts that make a light bulb shine
There's a lot of things that man made and one reason why

All us boys wanna grow up and make our mamas proud
Find that girl who lifts us up when life gets us down
Behind any guy doing anything right is a woman's work at hand
If a man made anything it's 'cause a woman made that man

Well, I bet money that man made the wheel
So he could drive a girl around and get stuck in some field
And you can't convince me that Da Vinci would be as famous as he is
If Mona Lisa didn't smile at him the way she did

All us boys wanna grow up and make our mamas proud
Find that girl who lifts us up when life gets us down
Behind any guy doing anything right is a woman's work at hand
If a man made anything it's 'cause a woman made that man

There are reasons why and reasons how we do the things we do
And honey, all of mine without a doubt are you

All us boys wanna grow up and make our mamas proud
Find that girl who lifts us up when life gets us down
Behind any guy doing anything right is a woman's work at hand
If a man made anything it's 'cause a woman made that man
