Weigh Me Down

Matt Terry

I thought I had it figured out
Then you walked in, the air went out
I was used to feeling empty and alone
I was so medicated
Now I don't need no fix to feel alive
With you, I'm levitating

Baby I'm so high up your love
I need something to weigh me down, to weigh me down
I see clouds from above
I need something to weigh me down, to weigh me down
But there is no gravity
When it comes to you and me baby
I'm so high up your love
Baby come weigh me down

You pressed your lips against my chest
And I can't stop myself floating off the bed
I was used to feeling empty and alone
I was suffocating
Now I'm breathing every moment
And from here, the view is so amazing

Oh baby I'm so high up your love
I need something to weigh me down, to weigh me down
I see clouds from above
I need something to weigh me down, to weigh me down
But there is no gravity
When it comes to you and me baby
I'm so high up your love
Baby come weigh me down

So put your body on mine
Put your body on mine now
Put your body on mine (baby come put your body on mine)
So put your body on mine
Put your body on mine now
Put your body on mine

Oh baby I'm so high up your love
I need something to weigh me down, to weigh me down
I see clouds from above
I need something to weigh me down, to weigh me down
But there is no gravity (enough to hold me)
When it comes to you and me baby
I'm so high up your love
Baby come weigh me down
