

## Half A Smile

Matt White

Just a lonely girl  
With blonde on the side  
Breaking little hearts  
Then she captured mine

It was late one day  
And we were all alone  
She told me she was leaving  
With a heart of stone

And then a half a smile, just walk away  
And I've never loved this way before  
Half a smile, she walks away  
I've never loved this way before  
Don't want it anymore

I would see her friends  
Drinking at my bar again  
I couldn't help but ask  
Oh where she'd been

And then [?] smiles and walk away  
I've never loved this way before  
Just a smile and walk away  
I've never lost this way before  
Don't want it anymore

I saw her downtown  
With another man  
She said he's just a friend  
And then she shook my hand

And then a half a smile, and walk away  
And I never lost this way before  
Half a smile and walk away  
I never lost this way before

And she smiles and walks away  
And I never loved this way before  
And I smile and walk away  
I never loved this way before  
Don't want it anymore
