Us Remains Impossible

Matthew Good

Come on over, you'll regret it
Drive you nuts if you let it
Breathe in only 'til you get it
The waves go on and on

There's a light up there tonight
That shines a lady all year bright
It's all the same, the you and I
It's over now, I know it's sorry

I know you so you know me
But us remains impossible

Come on over, you'll regret it
Crack you up if you let it
Hang on only 'til you get it
The weight goes on and on

There's a light up there tonight
That shines a lady golden bright
I long to wait for you and I
It's over now, I know it's always

And I know you so you know me
But us remains impossible
And I know you know that I ain't me
So us remains impossible
