

AWOL

Matthew Parker

You vanished out the window while I was dreaming
Ticking clocks and cricket songs kept me fast asleep
I leave the window cracked and the lantern gleaming
But only darkness comes to keep me company

I know you're out there (know you're out there, know you're out there
)
Somewhere (somewhere, somewhere)

I wonder, where'd you go?
You left me all alone
Oh, bravery, come back for me
To keep the shadows from taking over
There you go
I glimpse you through the smoke
I'll cross my heart, hope to survive
Until you're back home
And the worst is over

Yeah, we're just like the trees and leaves in autumn
We were meant to be, but the winter breeze brought destiny, oh
I'm frozen in slow motion here without you
Please, make a sound, I need you now so desperately

I know you're out there (know you're out there, know you're out there
)
Somewhere (somewhere, somewhere)

I wonder, where'd you go?
You left me all alone
Oh, bravery, come back for me
To keep the shadows from taking over
There you go
I glimpse you through the smoke
I'll cross my heart, hope to survive
Until you're back home
And the worst is over

I wonder, where'd you go?
You left me all alone
Oh, bravery, come back for me
To keep the shadows from taking over
There you go
I glimpse you through the smoke
I'll cross my heart, hope to survive
Until you're back home
And the worst is over

Oh, bravery, come back for me
(Come back for me, come back)
