

Down In Flames

Matthew Parker

It's all downhill from here
We chose the poison not the cure
What have we done
What can be done

Like a comet falling down, down, down, down
Can you hear us falling?

We're going down in flames, oh
Can anybody save us now
We're going down in flames, oh
Can anybody save us no-ow
We are burning, bleeding
You are what we're needing
'Cause we're going down in flames
We're going down in flames

It's time we faced the truth
We burned our bridges when we burned you
What have we done
What have we become, oh

Like a comet falling down, down, down, down
Can you hear us falling?

We're going down in flames, oh
Can anybody save us now
We're going down in flames, oh
Can anybody save us no-ow
We are burning, bleeding
You are what we're needing
'Cause we're going down in flames
We're going down in flames
