

# Immortal

Matthew Parker

Can you feel the infinity of time  
Endless ages without regard for your transient life  
Going on (on and on)  
Going on (on and on)  
Going on forever

We were made with a sense of forever  
Burning through our minds  
We were made for more than just a few short years  
That we're alive

We are immortal  
We will live forever  
In another sky  
In another life  
We are immortal  
Every moment counts  
Every human matters  
We are immortal  
We are

Breathe the temporary air  
See the fading sights of this dying world  
Our home is not a cosmic ball that twirls  
(Round and round and round we go)

We were made with a purpose for being here  
More than meets the eye  
There's more to life than just a lifetime  
That we call life

We are immortal  
We will live forever  
In another sky  
In another life  
We are immortal  
Every moment counts  
Every human matters  
We are immortal  
We are

We are immortal  
We will live forever  
In another sky  
In another life  
We are immortal  
Every moment counts  
Every human matters  
We are immortal
