

Living in darkness
Ages and ages of time go by
But You made a promise
The holy Messiah would leave the sky
To bring us redemption
We have hopelessly lost our way
But now You've come to drive our darkness away, oh

We can finally see the light
Like a star in darkest night
Bringing peace on earth for all mankind

We did not know love
But You showed it to us when You came to die
With no hesitation
You reached out to us and You gave Your life
To give us salvation
We were lost in the darkest night
But now You've come to put our darkness to flight

We can finally see the light
Like a star in darkest night
Bringing peace on earth for all mankind
We can finally see the light
Of a love so blinding bright
It will kindle hope for all mankind, whoa

Can you hear the angels singing
Glory, oh glory to God
Hope is born this day, we're singing
Glory, oh glory to God
Hallelujah, hallelujah
Hallelujah

We can finally see the light
Like a star in darkest night
Bringing peace on earth for all mankind, mankind
We can finally see the light
Of a love so blinding bright
It will kindle hope for all mankind, oh-oh

And it will still burn bright 'til the end of time
