

# Lately

Matthew Parker

Doing okay, got my Red Bull, hey  
I'm just staying on the down-low, working on a tune so  
Tryna stay busy to forget that I miss you like crazy  
I'm working like a slave on my album, you know  
Missing you here out on the east coast  
I've been working late, I feel like a freak show  
That's me lately

Yeah, I don't wanna feel alone like this forever  
I don't wanna feel alone  
Yeah, I don't wanna be just one lovebird without the other  
I don't wanna feel alone

But that's been me lately  
I could be there when you call my name  
You're just seven hundred miles away  
We'll go walking on the promenade  
We wouldn't be lonely, but that's been me lately

Wake up cold in the morning, first thing on my mind is you  
I can understand why they say love hurts  
But I'm a man, not supposed to get emotional  
I got love on my brain, I'm irrational  
Yeah, 'cause I miss you girl, and it's making me crazy

Yeah, I don't wanna feel alone like this forever  
I don't wanna feel alone  
Yeah, I don't wanna be just one lovebird without the other  
I don't wanna feel alone

But that's been me lately  
I could be there when you call my name  
You're just seven hundred miles away  
We'll go walking on the promenade  
We wouldn't be lonely, but that's been me lately  
But that's been me lately  
We wouldn't be lonely, but that's been me lately
