

Shadowlands

Matthew Parker

The moon and the stars are the only light
To tell us that we're lost
In the endless darkness of night
And we can't find the way
To be free
For our blindness to cease
So we can see
What we've been missing

So send your light
Send your light (your light, your light)
Woah

Here we are in the dark
And we can't find a way
To fly away, oh
Here we are in the shadows
That our sins create
We can't escape

So savior save us
Break this darkness
Take those storm clouds from the sky
Send your light

The only hope in the midnight sky
Is the coming light of dawn
We're sitting here cold and helpless now
And all our strength is gone
With the wind
And its howling again
These shadowlands
Truly need your sunshine

So send your light
Into the shadowlands
Woah

Here we are in the dark
And we can't find a way
To fly away, oh
Here we are in the shadows
That our sins create
We can't escape

Here we are in the dark
And we can't find a way
To fly away, oh
Here we are in the shadows
That our sins create
We can't escape

So savior save us
Break this darkness
Take those storm clouds from the sky
Send your light
