

# Time Stands Still

Matthew Parker

So let the world go on without me, mm  
Let them do what they will do, mm  
Let them chase the wind without me, yeah  
'Cause I just wanna be with you

I used to be out on the sea  
A little bird with broken wings  
But you became my everything  
And I believe that will never change

Time stands still when I'm with you, when I'm with you  
And love is real when I'm with you, when I'm with you  
And I will stay as long as you feel  
And I will stay where time stands still with you, mm

So let the world spin on without me, yeah  
Let them do what they will do, let them do what they will do  
Let them chase their gold without me, there's time to kill  
When time stands still with you, with you

I used to be a broken thing  
A ticking clock, just a machine  
But you became my everything  
And I will be forever changed

Time stands still when I'm with you, when I'm with you  
And love is real when I'm with you, when I'm with you  
And I will stay as long as you feel  
And I will stay where time stands still with you

When I'm with you my mind just comes alive  
You are the spark that lights the flame in me  
When I'm with you the whole world fades away  
And you're the one thing that remains

And time stands still when I'm with you, when I'm with you  
And love is real when I'm with you, when I'm with you  
And I will stay as long as you feel, oh  
And I will stay where time stands still with you, mmm
