

We Will Dance

Matthew Parker

Eternity calls to me
The light inside me calls in return
'Cause it's our destiny
To live forever with our God
We are the ones filled with wonder
While the world's complacent in autumn days
We will dance on the swirls of the galaxies
For all our days

We will dance and we will soar
Through the golden stars forever
We will fall into the arms
Of our Creator
We will dance like there's no tomorrow
'Cause today will never end
We will thrive here in the glory of
Our Maker

We will dance, oh, oh
We will dance, oh, oh
We will dance, oh, oh
Woah

The days go by so fast
Eternity's coming quickly
Be all that you're meant to be
'Cause the present is slipping away presently
No, we don't have to wait
'Til the end to give it all we got
We will dance until we die, and then we dance some more
Are you ready tonight?

We will dance and we will soar
Through the golden stars forever
We will fall into the arms
Of our Creator
We will dance like there's no tomorrow
'Cause today will never end
We will thrive here in the glory of
Our Maker

We will dance, oh, oh
We will dance, oh, oh
We will dance, oh, oh
Woah
Woah
