

# Trick

Matthew Sweet

I felt the new earth was moving  
I took it under my stride  
I rode the sun while the moon beams  
And I felt really alive

While you slept  
I looked into the past and then I knew  
Sometimes it's just a trick of the light we see  
Always hard to tell what could be real  
Is it just a trick of the light?

Well, it shows  
Shows us who we wanna be  
While I'm asleep, are you dreaming?  
Or are you kidding around?  
Oh no, I'm no substitution  
For what you could've found

And while you slept  
I looked into the past and then I knew  
Sometimes it's just a trick of the light we see  
Always hard to tell what could be real  
Is it just a trick of the light we see?  
Is it just a trick of the light?  
That only shows  
Shows us who we wanna be

While you slept  
I looked into the past and then I knew  
Sometimes it's just a trick of the light we see  
Always hard to tell what could be real  
Was it just a trick of the light?  
Sometimes it's just a trick of the light we see  
Always hard to tell what could be real  
What is just a trick of the light?  
That only shows  
Shows us who we wanna be

I felt the new earth was moving  
I took it under my stride  
I rode the sun while the moon beams  
And I felt really alive
