

## Born for This

Matthew West

All my life I've been searching for the answer  
For the answer to the question  
Where are you  
Up all night  
Tryin' to see into the future  
Hoping you were somewhere out there searching too  
And out of nowhere it's a smile and shy hello  
and it's say goodbye to life as you know it

Now I'm not asking questions any more,  
I found the secret I was put here on this earth for  
Every heart beat pounding inside my chest  
Is telling me that we were born for this  
For this perfect moment and every moment after  
For this first day of forever,  
Eyes closed kiss, we were born for this

A thousand miles walking in the wrong direction  
Turns out I was always headed straight to this  
Place in time all the pieces finally did arrive  
When you take my hand it feels like I am home  
And out of nowhere are the answers to a prayer,  
I see you standing there, life as you know it

Now I'm not asking questions any more,  
I found the secret I was put here on this earth for  
Every heart beat pounding inside my chest  
Is telling me that we were born for this  
For this perfect moment and every moment after  
For this first day of forever,  
Eyes closed kiss, we were born for this

It doesn't matter where I go from here, as long as I go there with you  
u  
All my life I've been searching for the answer  
For the answer to the question where are you

I'm not asking questions any more,  
I found the secret I was put here on this earth for  
Every heart beat pounding inside my chest  
Is telling me we were born for this  
For this perfect moment and every moment after  
For this first day of forever,  
Eyes closed kiss, we were born for this

It doesn't matter where I go from here, as long as I'm going there with you
