

Cyclone

Maude Latour

It was kind of like a knife overnight
Didn't I build my life around you
Who am I without you?
I cried 'til water filled my room
Lookin' at the facts
I react a little fast
So much I regret, babe
Hopin' you'll forget, babe
Apologize until my lips are blue

Growing pains, push away
Need space, I know you feel the same
I know you feel the same

But it's a heat wave summer
I don't want to feel cold
Miss you like a hurricane
Spinning cyclone
We would stay up all night
Talking 'til it's alright
Whisper 'til you stop cryin'

No, I'm not afraid
I know how to be alone
Miss you like a hurricane
Spinning cyclone
Tell you life is so long
Even if I'm dead wrong
Love you 'til I'm all gone

I guess I never had the words to explain what it meant
Just how much I needed the love that I believe in
I let it fall until I saw you leavin'

Growing pains, push away
Need space, I know you feel the same
I know you feel the same

But it's a heat wave summer
I don't want to feel cold
Miss you like a hurricane
Spinning cyclone
We would stay up all night
Talking 'til it's alright
Whisper 'til you stop cryin'

No, I'm not afraid
I know how to be alone
Miss you like a hurricane
Spinning cyclone
Tell you life is so long
Even if I'm dead wrong
Love you 'til I'm all gone

I'll always see you like at fifteen
Dancing, not afraid of anything
It kills me, fighting

Forgive you for everything (Everything, everything)
I'm sorry for everything
I'm sorry for everything

Heat wave summer
I don't want to feel cold
Miss you like a hurricane
Spinning cyclone
We would stay up all night
Talking 'til it's alright
Whisper 'til you stop cryin'

No, I'm not afraid
I know how to be alone
Miss you like a hurricane
Spinning cyclone
Tell you life is so long
Even if I'm dead wrong
Love you 'til I'm all gone

You know me well
You know me well
You know me well (You know me well)
You know me well (You know me well)
You know me well (You know me well)
You know me well (You know me well)
You know me well (You know me well)
You know me well
