

Probabilities

Maude Latour

Weren't we just nineteen
It was sophomore spring
Now I'm twenty-three
I'm feeling everything
Sometimes I wanna give up
But you're keeping me up
You put those blue lights on
And turn my room into a club (Ah-ah, ah, ah-ah, ah)

Probabilities
All we have is chances
I want something to believe
You tell me to shut up
And keep on dancing

Baby, don't be scared
I can tell the future's bright
Little bit of love and care
Learning how to trust your light

Play that song from high school
Class of '17
We used to scream all the words
Now I know what they mean
You put your makeup on
Six flights to the roof
Wave function collapse
When I'm looking at you

Probabilities (Ooh, baby)
All we have is chances
I want something to believe (Ooh, baby)
You tell me to shut up
And keep on dancing

Baby, don't be scared
I can tell the future's bright (Ah, ah)
Little bit of love and care
Learning how to trust your light

Weren't we just nineteen
It was sophomore spring
Now I'm twenty-three
I'm feeling everything
Sometimes I wanna give up
But you're keeping me up
You're the reason I'm here
You're the one that I love

Ah, ah-ah, ah-ah, ah (Probabilities)
Ah, ah-ah, ah, ah, ah-ah (Probabilities)
(Probabilities)
