

# Space

Maude Latour

Baby can you come back down from space  
I spent the whole night staring at your face  
Why don't you think you can stay?  
Across the apartment I look your way  
I just wanna know did she take my place?  
Guess you never mean what you say

And it's hard not to come down from space  
Hitting the clouds, drinking your waves  
And I think of you everyday  
Deep in my sleep, whisper your name

Every night I go to space  
Just so I could forget you baby  
There's so much I didn't say  
Like I don't wanna forget you baby  
If it was really love  
We would've walked you to the sun  
And you wouldn't give a fuck about anyone but us  
But you do  
You do  
You do

I heard you moved south and your address changed  
Can't get the phone 'cause you're boarding a plane  
Why are you miles away  
Short skirts lay to your hotel  
I watch you go wild for someone else  
Babe, don't you think I could tell

And it's hard not to come down from space  
Hitting the clouds, drinking your waves  
And I think of you everyday  
Deep in my sleep, whisper your name

Every night I go to space  
Just so I could forget you baby  
There's so much I didn't say  
Like I don't wanna forget you baby  
If it was really love  
We would've walked you to the sun  
And you wouldn't give a fuck about anyone but us  
But you do  
You do  
You do

I keep a little space for you in my brain  
I save a little place for you if you need it  
You need it baby

And it's hard not to come down from space  
Hitting the clouds, drinking your waves  
And I think of you everyday  
Deep in my sleep, whisper your name

Every night I go to space  
Just so I could forget you baby

There's so much I didn't say  
Like I don't wanna forget you baby  
If it was really love  
We would've walked you to the sun  
And you wouldn't give a fuck about anyone but us  
But you do  
You do  
You do  
Yeah, you do  
You do  
You do
