

Wasted

Maude Latour

I know that you're back the way that you are
You wanna get out of town
And I know you get by
Each lie after lie slipping out of your mouth
Got a way with your words, I don't care if it hurts
I fell for the way that it sounds
I'm in love with the dark, you're the king of my heart
Made it here and I don't care how

So, I stop counting all of your lies
Numbers are too high and so am I
I'll just get wasted on them instead
They make the room dizzy and they put me to bed

You play me so great
Love's a drinking game, so let's drink what we got
You don't need a clean slate
Just say what you say and you got me locked
But, I worship your voice with your smile so coy
Pull me up and I won't look down
I love all your lies I couldn't take a goodbye
I need the dark if I wanna shine bright

So, I stop counting all of your lies
Numbers are too high and so am I
I'll just get wasted on them instead
They make the room dizzy and they put me to bed

So, you can lie and that's alright
I only need you near me and I'll be fine
I've got to say thank you, babe
For taking me to the other side

So, I stop counting all of your lies
Numbers are too high and so am I
I'll just get wasted on them instead
Make the room dizzy and they put me to bed

So, I stop counting all of your lies
Numbers are too high and so am I
I'll just get wasted on them instead
Make the room dizzy and they put me to bed
