

Into Nirvana

Maverick Sabre

I was chasing oasis
Champagne supernova
I wonder walls of the city
And do we all live forever?
Take a shot, take a big one
I get lost in the headrush
Don't look back in the morning
Another job, another foreman
My fears are frozen in golden brandy
Into the mirror I stare
My thoughts are clouded in cotton candy
Into the moment I fell

So then I go and run away, away
Then I go and run away
And then I go and run away, away
So then I go and run away
So then I go and run away, away
So then I go and run away
So then I go and run away, away
So then I go and run away

I've been searching for roses
In a land man made of stone here
There's waterfalls in the graveyard
There's fools gold in my pocket
Is anyone still a dreamer?
They shoot you down for believing
All we want to be is adored
Can you really see love on the screen now
We're surviving off hope and mandy
Into the morning we stare
And I've been drinking this golden brandy
Into the mirror we stare

So then I go and run away, away
Then I go and run away
Yeah, then I go and run away, away
Then I go and run away
So then I go and run away, away
Then I go and run away
Yeah then I go and run away, away
So then I go and run away

Yeah then I go and run away, away
Then I go and run away
Then I go and run away
Then I go and run away
Then I go and run away
Then I go and run away
Then I go and run away

Yes then I go and run away, away
Yes then I go and run away
Yes then I go and run away
