

I been underrated still negotiating not what I thought I would make  
But what thought I would become when I let God use me for love  
But eluding my due punishment is dumb as shit  
Including learned reflexes toward running I don't come from that  
Freshman year dc told upperclassmen I am come for frats  
Jus backbreaking backwoods breaking and blades became a lumberjack  
Do I mourn my born gifts thrown away or I become the trash  
How strong is this force of orbit that make me become my dad  
Whispers to redistribute before a hunnit racks  
What is it to come from nothing  
Come up but with nothing back  
Only hear good luck in passing never hear I'm proud of you  
Never hear u fw magic always asked how high are you  
We broke your pack into fractions they know I'm behind it too  
I jus be going to classes idk who lied to u  
Bashful bout moments of passion I shouldn't confide in you see  
now you crying too  
Learned my lesson about quiet soon as  
You make minor improvement  
It's gone when it's here I try to lose it  
Know her eyes do voodoo  
I make her sob they slicing through me  
I'm pulling tight maneuvers to make a lane of size and room  
To fit my gang entire crew  
Like lil Wayne inside this two liter is my business  
Watch me spread this money out in my hand now my mom grinning  
She say I got too much time on my hand and the watch delivered  
Right after the permit app for the strap she eye me different  
It's aight I'm still her angel  
I jus work in industries w enemies that come w danger  
Ima get my niggas free this in between about some paper  
A bitter taste in my mouth but they say this the time to savor  
I'm sedated nauseated anger sated face elated  
I been underrated  
Been underrated it ain't nun new  
Like the Olmec been discovered paper  
Couple routes  
Smoking on myself when I hit the shelf it won't be #2
