

## Atoms

Max Barskih (Макс Барских)

I don't-don't realize  
When I'm weightless above the ground  
Heart beating inside  
Everytime makes a different sound  
I was lost, never seen 'til this moment  
What pretty girl that you are  
And I said to myself

I wanna love you, and nothing else matters  
I wish I could feel your breath forever  
Hold you in my arms, whisper in your ears  
But you will never be, never be mine  
In music - more volume, in body - more senses  
And your atmosphere has all I get off  
Flying around you, and when you're with my heart  
I won't be able, be able to touch...

Don't stop - perfect body on the floor  
You're my drug, I'm driving you, more and more  
And I know, and I know, it's wrong way  
I should stop it right now  
I can't...  
Wrong hands touching your tanned skin  
New pain came to me and I began  
Run away, run away from my mind  
Never felt this before...

I wanna love you, and nothing else matters  
I wish I could feel your breath forever  
Hold you in my arms, whisper in your ears  
But you will never be, never be mine  
In music - more volume, in body - more senses  
And your atmosphere has all I get off  
Flying around you, and when you're with my heart  
I won't be able, be able to touch...

And I know, and I know, it's wrong way  
I should stop it right now

I wanna love you, and nothing else matters  
I wish I could feel your breath forever  
Hold you in my arms, whisper in your ears  
But you will never be, never be mine

I wanna love you, and nothing else matters  
I wish I could feel your breath forever  
Hold you in my arms, whisper in your ears  
But you will never be, never be mine  
In music - more volume, in body - more senses  
And your atmosphere has all I get off  
Flying around you, and when you're with my heart  
I won't be able, be able to touch...
