

Higher

Max Barskikh (Макс Барских)

Skin is cold in frozen air
Ain't no life around but we're still here
With my hands, I can melt your heart
Let's pretend that we depart

Turn off the lights and close your door
I will take you there, more and more
Nobody can imagine space of the sky
So get high...

We're going higher off the earth
Enjoy the silence
Higher to the stars
So catch the starlight

Higher
Off the sun
Higher
Off the sun

We are weightless in the dark
Ain't no sunshine here let's make some sparks
No one sees us in that place
Look at me, come closer - face to face

Turn off the lights and close your door
I will take you there, more and more
Nobody can imagine space of the sky
So get high...

We're going higher off the earth
Enjoy the silence
Higher to the stars
So catch the starlight

Higher
Off the sun
Higher
Off the sun

No one can say that the world still exists
Let's forget about everything, just hold my wrists

We're going higher off the earth
Enjoy the silence
Higher to the stars
So catch the starlight

Higher
Off the sun
Higher
Off the sun
