

Comes Back 2 U

Max Frost

What do you hear
When there's no sound
What do you see
With no stars out

Every time I close my eyes
When I lay awake at night
Every little thing I do
It all comes back
It all comes back to you
To you

I brush my teeth
And cut the yard
This air I breath
It comes out hard
Every time I fake a smile
Standing in the grocery aisle
Every little thing I do
It all comes back
It all comes back to you
To you

Every time I close my eyes
When I lay awake at night
Every little thing I do
It all comes back
It all comes back to you

I remember every word that you told me
I watch you slowly
Need and destroy me
I remember every word that you told me
You didn't know me
You didn't know me

I remember every word that you told me
I watch you slowly
Need and destroy me
I remember every word that you told me
You didn't know me
You didn't know me
