

# Head In The Clouds

Max Frost

You got your head up in the clouds, babe  
It's like you're next to me but miles away  
You gotta speak, don't hesitate  
I wanna know the words that you don't say

Click clack, click clack, time's ticking on  
This and that, this and that, singing my favorite song  
Thought I'd see you round, but you're never home

I wish you wouldn't hold back, you know that  
It gets lonely, lonely, lonely  
I'm driving down on MoPac by those tracks  
I move slowly, slowly  
You won't show me why you hold back, do me like that  
When I only, only wanna drive with you now  
MoPac by those tracks  
We'll move slowly, slowly, yeah

You got your head up in the  
In the clouds, having doubts, that was then but this is now  
I wonder who's just another number?  
I got so many things to say, but we never conversate  
We don't drive, we just talk in place  
We got thoughts that we ought to face

Click clack, click clack, yeah time's ticking on  
This and that, this and that, singing my favorite song  
Thought I'd see you round, but you're never home

I wish you wouldn't hold back, you know that  
It gets lonely, lonely, lonely  
I'm driving down on MoPac by those tracks  
I move slowly, slowly  
You won't show me why you hold back, do me like that  
When I only, only wanna drive with you now  
MoPac by those tracks  
We'll move slowly, slowly, yeah

I wish you wouldn't hold back, you know that  
It gets lonely, lonely, lonely  
I'm driving down on MoPac by those tracks  
I move slowly, slowly  
You won't show me why you hold back, do me like that  
When I only, only wanna drive with you now  
MoPac by those tracks  
We'll move slowly, slowly, yeah
