

Ah, I'm so electric  
Every time we touch, yeah, we're so connected  
You're the one that I want to get used to  
You're the one that I want but it's too soon  
'Cause I roll round, body restless  
You just hit my phone, I'm getting the message  
You're the one that I want to get used to  
You're the one that I want but it's too soon

I like to hang out and do my thing  
But I got a battle inside my brain  
'Cause when I saw you, I went insane  
Can't shake the shivers, but here's the thing  
I just got out of a two year relationship  
I'm not ready to be jumpin' in nothing like this yet  
But the signals that you're sending me  
Got my entire nervous system firing off inside my head

Ah, I'm so electric  
Every time we touch, yeah, we're so connected  
You're the one that I want to get used to  
You're the one that I want but it's too soon  
'Cause I roll round body restless  
You just hit my phone, I'm getting the message  
You're the one that I want to get used to  
You're the one that I want but it's too soon

You got me spaced out, inside a zone  
Not sure I've ever been in before  
Filling this void deep inside my soul  
Maybe I want you, maybe I don't  
'Cause I'm jaded by the simple fact that nothing lasts forever  
And I hate it when I'm not in control  
If I give my heart away I might be taking it back again  
So I'm giving you my lovin' to-go

Ah, I'm so electric  
Every time we touch, yeah, we're so connected  
You're the one that I want to get used to  
You're the one that I want but it's too soon  
'Cause I roll round body restless  
You just hit my phone, I'm getting the message  
You're the one that I want to get used to  
You're the one that I want but it's too soon

Ah, I'm so electric  
Every time we touch, yeah, we're so connected  
You're the one that I want to get used to  
You're the one that I want but it's too soon  
'Cause I roll round body restless  
You just hit my phone, I'm getting the message  
You're the one that I want to get used to  
You're the one that I want but it's too soon, yeah
