

No One Else

Max & Harvey

I know were looking at the world through different eyes
But it's bright when your by my side
And I've been biting my tongue all day
I've got something to say
And I think it's time that you know

No one else, no one else
Can knock me down
No one else, no one else
I wanna around
It's the only thing I know
No one else, no one else
Is worth the chase
No one else, no one else
I'd rather face the world with
When it's a world with you
There's no one else, no one

All I knew from the moment that we met
That this just made so much sense
I get embarrassed too
When you catch me looking at you
And I'm just glad that you know

No one else, no one else
Can knock me down
No one else, no one else
I wanna around
It's the only thing I know
No one else, no one else
Is worth the chase
No one else, no one else
I'd rather face the world with
When it's a world with you
There's no one else, no one

I know were looking at the world through different eyes
But it's bright when you by my side
And I've been biting my tongue all day
I've got something to say
And I think it's time that you know

When you by my side

No one else, no one else
Can knock me down
No one else, no one else
I wanna around
It's the only thing I know
No one else, no one else
Is worth the chase
No one else, no one else
I'd rather face the world with
When it's a world with you
There's no one else, no one

Everything's brand new

It's no one else, no one
It's a world with you
There's no one else, no one
